#### COMPETITIVE DRILL

First Battalion, High School Cadets, Before the Judges.

TEN THOUSAND SPECTATORS PRESENT

Companies Vociferously Applauded by Their Respective Partisans.

SECOND BATTALION TODAY

The individual who has never attended an annual company competitive drill of the regiment of High School cadets may properly be classed as deserving of sympathy Not alone is the event the feature of the High School year, but it is notable, in a way, as regards the community at large. Only those who have witnessed one of these competitions are in a position to realize just what the scene at the American League base ball park, for two hours, really was yesterday afternoon. Imagine a solid mass f humanity made up of nearly or quite 10,000 persons, every one of them shricking and yelling like mad, and waving ribbons, stranger such a gathering of spectators is one sufficient to hold attention. What transpires on the drill field seems but a

mere incidental of the affair. without the High School girl the annual contest for the prize first, open to the eight companies of the regiment of cadets, would in all likelihood amount to nothing more than a mere commonplace occurrence. But der. She is in a class entirely by herself. Nowhere else in the world is her equal to be found. The indications are that she has now in progress, with nearly if not quite as much interest and eagerness as has any cadet of the regiment. For weeks past she pany into all sorts of unique shapes for dis-play at the drill grounds. She has even gone to the extent of making a dress of the appropriate colors. She was very much in evidence at the base ball park yester-

day, was the Washington High School girl. Early on the Ground.

As early as 2 o'clock in the afternoon those who were to be spectators began the journey to the park, having grown anxious after the postponement of a week, due to inclement weather, and long before 4 o'clock, the hour set for the drilling to begin, the seating capacity of the inclosure was taxed to the extreme limit. And this. companies-those of the first battalionere to appear before the judges. The first station, comprising Companies A, B, C and D, hails from the Central High School and quite naturally its following is largely from that institution. Of course, there are hundreds who will be disappointed if their marrieds who will be disappointed it well particular company of the four does not win the flag, but their grief will be in a large degree assuaged if one of the other three finishes in the lead and takes the trophy back to the Central. The attendance this afternoon will unquestionably be larger than that of yesterday, for the reathat the four companies of the second following, due to the fact that they are located at widely separated points of the city. Company E represents the Business High School; Companies F and G the East-

Oldest U. V. U. Command to Celebrate

Hancock Regiment, No. 1, Union Veter

ans' Union, held a largely attended meet-

ing last night at its hall in Society Temple.

Cel. Frank T. Howe presiding. Gen. Payne,

chairman of the special committee on ways

and means to liquidate the indebtedness re-

maining from the encampment, made a

partial report and the regiment decided by

unanimous vote that no bill for money ex-

pended for campfire to entertain the visit-

and musical program, supplemented by re-

AFFAIRS IN GEORGETOWN.

General and Personal Items Gathered

last evening with a very large attendance.

All of the booths did a flourishing business.

A cake walk by the Old Dominions fur-

nished the amusement of the night. Mr.

Harry King was the winner of the hand-

some rosary, while Miss Lou Loftus of

Baltimore won the large pyramid cake.

Mrs. Charles Stohlman won one of the sil-

ver punch ladles, and ticket No. 19 won

the other, the holder of which could not

be found. Father Mallon drew the ton of

coal. It is estimated that the fair will clear about \$2,500, and may exceed this sum. The ladies who assisted will be en-tertained at the hall tomorrow evening.

The fair of St Ann's new church closed

Hancock Regiment.

pany will be announced at the conclusion of the drilling this afternoon. Again, all who were present yesterday will be sure to be on hand today, so that it is not too much to say that the winning company will be called to the front and center and applauded by a gathering mammoth in its

The spectators at these drills have established a custom of locating themselves by schools. For instance, those particularly interested in the Western High School take exclusive possession of a portion of the grand stand and firmly intrench themselves by stretching huge banners bearing the letter "H." The Business High School supporters do likewise in another portion of the stand, only the letter they push to the front is "E." The same applies to the Eastern and Central. Any attempt on the part of the rooters for any one company to utter a sound is promptly met by vocal obstacles from the backers of all the other obstacles from the backers of all the others. The root of the rooter who roots in connection with the High School drill is something long to be remembered, even by the initiated. Each company and each school has its distinct and separate yell and when all are doing business at one and the same time the result is pandemonium.

All Vociferously Applauded.

When Company D, the first of the organizations to compete, marched on the field in columns of fours, formed line to the right and marched toward the grand stand, halted and presented arms to the judges, who were First Lieut. Winfield S. Overton, Artillery Corps; First Lieut. James S. Herron, 8th Cavalry, and Second Lieut. Walter B. Smith, 6th Calvary, all of the United States army, the cadets faced an assemblage including prominent officials of the army and navy, Commissioners of the District of Columbia, members of the board of education, officers of the District National Guard and most of those connected in an official way with the public schools. The maneuvering was watched with interest. All who were present on the the cadets on the white Lot expected the boys to make an excellent showing yesterday, and they were not disappointed. After presenting arms to the judges the company stacked rifles, marched a few paces to the rear, and, having removed belts and unbuttoned blouses, the young soldiers went through a half dozen of the setting up exercises preservined in the army Arth roge.

Captain, W. C. Shephard: lieutenants E. ercises prescribed in the army drill regu-lations. The boys next executed the manual of arms and a number of marching movements, including the school of the platoon. Volley firing earned applause. A few more marching movements were next in order and then the company fired at will. saluted the judges and marched from the field. The company was pursued by trusty

officers with big bouquets of flowers. As the applause for Company D wa dying out, the appearance of Company C The friends of Captain Shephard's command were loyal and possessed of requisite lung power. The applause was practically continuous the entire time the company had the field. The same holds true of Companies B and A. Each was cheered to the echo as it concluded its participation in the competition and the of-ficers were fairly burdened with floral tributes. It was after 6 o'clock when the assemblage dispersed for needed rest, so far as the vocal cords were concerned.

Big Day Today.

This may be described as the big day of the drill. When the eighth company of the regiment has concluded its work before the judges the latter will retire for consultation in order to agree as to the winner of the drill. While this important conference is in progress the regiment will be formed in line and give a brief exhibition drill. The judges will finally appear, and Lieutenant Overton, the chairman of the board, will very quietly disclose the eagerly awaited information as to the best-drilled company Colonel Boesch will instruct his adjutant,

tors of the school. The doors of the hall will be opened shortly before 7:45 o'clock. The fact that the home of truck E, on S street between 34th and 35th streets, is without a flagpole or flag has caused some comment among the residents of the lo-

ward the securing of a suitable national emblem, and a pole from which to fly it. Through some mistake the erection of a

pole was not included in the original plan

lieved that this is the only one in the de-

constructing the building, and it is be-

#### partment not so equipped. GROWTH OF MANUFACTURES.

ing delegates should be presented, and in-Census Report on the Industrial De structed its committee to withdraw any velopment of the Territories. estimate made for Hancock Regiment. It W. M. Steuart, acting chief statistician was the sense of the members that the only of the division of manufactures, census oflegitimate bills to be paid from the amount generously appropriated by the inaugura-tion committee were those for hall refice, has submitted to Director W. EUTERPE MUSICAL CLUB.

Concert Season Closed With a Program of Merit.

The Euterpe Musical Club brought its successful season to a close Friday evening with a public concert at the Gunton-Temple Memorial Church. A large audience filled the auditorium, including the German ambassador, the Chinese minister, Madame Leger and several other representatives of the diplomatic corps, as well as a large number of persons prominent in musical circles. The program proved enjoyable. Mr. Victor Sorlin of New York, the violoncellist, made his first public appearance in Washington. He displayed breadth and washington. He displayed branch was heard purity of tone that was satisfying. Miss Alice E. Burbage, the planist, was heard in a rendition of Liszt's Twelfth Rhapsodie. and in Wagner's "Song to the Evening Star." The members who participated displayed what a high standard the club had attained by earnest work.

attained by earnest work.

They were: Miss Florence Stevens, Miss Florence Weser, Mr. B. Frank Meyers, Miss Mattie Gibson, Mr. Wm. H. Scholz, Dr. John C. Exner, Mrs. Fannie Atlee-Gage, Mr. Horatio Rench, Mrs. Blanche Muir-Dalgleish, Mr. Melville Hensey, Mrs. W. L. Wilson, Miss Elizabeth Tyler, Mr. Fred. Seibold, jr., Mr. Reizenstein, Mrs. Frank Byram, Mrs. H. H. McKee and Miss Julia Von Entress.

Julia Von Entress.

The club will hold an informal reception it Gunton Memorial Church the evening of June 10. It now numbers over seventy members and its officers are: Wm. Muchleisen, president: Frank Byram president; J. Lewis Johnson, treasurer, and

Wm. H. Schalz, secretary.

A Virginia Audubon Society. Residents of Glencarlyn, Va., met recently at the home of Maj. W. B. King and organized the pioneer Audobon Society of Virginia. Mr. W. C. Pennywith presided at the meeting, with C. H. Shaffer as acting secretary. This society has for its aim the protection of birds, especially song birds, which are very plentiful and of numerous variety in that section, and hope to influence legislation to further this purpose. It also discourages the use of birds for decorating hats, &c. Mr. J. B. Henderson, jr., was elected president and Mrs. Julia B. Town secretary and treasurer of the so-ciety for the ensuing year. The by-laws of the District society, amended to suit local conditions, were adopted for the guidance of this organization. Children are allowed to become members of the society. The officers expect to make vigorous efforts during the coming year to carry out the purpose for which this society was organ-

### NEW UNIVERSITY

Government Resources to Be Utilized for Learning.

GEN. WASHINGTON'S PLAN ADOPTED

Organization Perfected and Officers Elected for the Ensuing Year.

SITE TO BE SELECTED HERE

The establishment of what will be practically a national university in the city of Washington has been accomplished. The universities and colleges of the country will be asked to co-operate in utilizing the various scientific and other resources of the government in arranging post-graduate courses in connection with the new institution, and the result will be, according to prominent educators, a higher and more comprehensive course than can now be obtained anywhere in the country.

The movement originated in the Washington Academy of Sciences, which appointed a committee to take charge of the matter last winter. This committee consisted of the president of the academy, Mr. Charles D. Walcott (chairman); Mr. Carroll D. Wright, commissioner of labor; Dr. C. Hart Merriam of the Department of Agriculture, and Mr. Marcus Baker of the geological survey. Communication was at once established with the board of trustees once established with the board of trustees of the George Washington Memorial Association, who appointed a committee to co-operate with the committee of the Washington academy, consisting of Mrs. Archibald Hopkins, president of the association; Mrs. F. B. McGuire, Miss Kibbie, Mrs. Charles D. Walcott, Mrs. Hubley D. Ashton. These two committees formulated and submitted a plan of agreement which was submitted a plan of agreement, which was approved by the board of managers of the Washington academy on February 26, 1901, and by the board of irustees of the memorial association on March 13, 1901. This plan provided for the founding in the city of Washington of an institution to be known as the Washington Memorial Institution.

Objects of Association. Memorial Association are, first, as implied kidneys and bladder are out of order. in its name, the creation of a memorial to George Washington; and second, as stated in its amended act of incorporation, the increase in the city of Washington of opportunities and facilities for higher education, as recommended by George Washington in his various annual messages to Congress, notably the first, the promotion of science and literature, substantially as set forth in his last will, and by and through such other plans and methods as may be necessary or suitable. The object of the Washington Academy of Sciences, the federated head of the the night. The mild and the extraordinary effect scientific societies of Washington, is the promotion of science, the term "science" being used in its general sense-knowledge, comprehension of facts and principles.

The two organizations agreed, first, that, although American universities have so developed since George Washington's time that they fulfill many of the objects of the National University outlined by him as desirable for the youth of the United States, there is still need of an organization in the city of Washington which shall facilitate the utilization of the various scientific and other resources of the government for pur poses of research, thus co-operating with all universities, colleges and individuals in giving men and women the practical postgraduate training which cannot be obtained elsewhere in the United States, and which is now available only to a limited degree in the city of Washington; and second, that the best method of securing the objects for which both organizations stand is the establishment within the Disthe permanent seat of government of the United States, of an institution whose ob-ject shall be the realization of Washington's repeatedly expressed wish and rec-ommendation that provision be made for the promotion of science and literature. In the further carrying out of the co-operation it was agreed that the George Washington Memorial Association under-take to secure a suitable site and erect

thereon a substantial, dignified building sa-cred to the memory of George Washing-ton; and that the Washington Academy of Sciences undertake to provide for the main tenance and for the conduct of the institution in the interest of science and liter-ature; and that there may be joined with it in this work the National Educational As-sociation, the Association of American Universities and the Association of Agricultural Colleges and Experiment Stations. Congressional Action.

The Washington Academy at once underook to secure the passage of a law au thorizing the utilization of the resources of the government departments for post-graduate study and research. Such an act of Congress was approved March 3, 1901, and reads as follows:

"That facilities for study and research in the government departments, the Library of Congress, the National Museum, the Zoological Park, the bureau of ethnology, the fish commission, the Botanic Gardens and similar institutions hereafter established shall be afforded to scientific investigators and to duly qualified individuals. learning in the several states and territories, as well as in the District of Columbia, under such rules and restrictions as the heads of the departments and bureaus men tioned may prescribe."

Plan of Organization. The plan of organization next agreed upon by the two committees was essentially as

Organization-A private foundation independent of government support or control. Objects-To facilitate the use of the scientific and other resources of the government for research; to co-operate with universities, colleges and individuals in securing to properly qualified persons opportunities for advanced study and research now obtainable only to a limited extent in Washington and not at all elsewhere. Government-The policy, control and man-

partment of Agriculture, Dr. Cyrus North-rop, president University of Minnesota;

or, president University of Minnesota; Dr. H. S. Pritchett, president Boston In-stitute of Technology; Dr. Geo. M. Stern-berg, surgeon general, United States army; Charles D. Walcott, president Washington

Academy of Sciences and director United States geological survey; Carroll D. Wright, commissioner of labor.

The trustees met yesterday and elected the following officers: Dr. D. C. Gilman, president John Hopkins University, direc-tor; C. D. Walcott, director United States

geological survey, president board of trus-tees; Dr. Nicholas Murray Butler, Colum-bia College, secretary; Mr. C. J. Bell, presi-dent Washington Security and Trust Com-

Credit if You Wish. No Extra Charge.

Terms to Suit.

Solid Oak **Plate** Rack,

A large purchase has placed us in a position to offer a number of these very handsome, solid oak Plate Racks, thoroughly well made and neatly finished, at the hitherto unheard-of price of 59c. As we know that so many people will want one we can only sell one to each customer.

Baby Carriages and Go-Carts.

We certainly have the best assortment in Washington. We have selected the cream of the patterns made by four of the most prominent manufacturers, which gives you a line of nearly 100 different styles and prices from which to make your selection.

A Handsome Reed Carriage for. \$3.98 A High-grade Reed Go-Cart for, \$7.75

Refrigerators and

We are convinced that there is no better line made than the one we carry. They are made of selected ash, with raised carving instead of the usual embossing. The trimings are real bronze, not iron bronzed over. The flues are removable, thereby insuring cleanliness. The ice rack is made entirely of galvanized iron; no wooden sticks to moid and decay. The waste pipe is removable and casy to cleanse. The insulation is the best, mineral wool charcoal sheathing, and air space being used.

Refrigerators like above start at \$9.00

House & Herrmann, 901-903 Seventh St., Corner of I (Eye) St. 

Wonder What Mertz Will Say Today?

# This is Serge Suit Weather.

Your wardrobe is not complete without a Serge Suit. They are so summerish and appropriate for most every occasion-pleasure, dress and general wear.

We will accord you the best tailoring values you have ever run across. Think over the matter, and we are sure you will agree with us that it is the best of judgment to have a Suit made expressly-for-you, instead of the readymade kinds. The cost is reasonable at these prices.

\$10 to-order. \$12.50 to-order. \$15 to-order. \$18 to-order.
